WEEK 12

A diagram of a cylinder. A vertical dashed line passes through the center of the cylinder. A solid line is drawn on the surface of the cylinder, starting from the top edge and ending at the bottom edge, following the curve of the cylinder.

3 | 22 SUN

The diagram shows a double-stranded DNA molecule. Two horizontal lines represent the sugar-phosphate backbones. Between them, vertical lines represent base pairs. In the center, the two strands separate, creating a gap. This gap is flanked by two vertical dashed lines, indicating the region of interest for the study.
