2026
WEEK 3

1 | 18 SUN

A diagram showing a rectangle with a dashed vertical line passing through its center. At each end of the rectangle, there is a semi-circle. The semi-circles are positioned such that their flat edges are aligned with the vertical dashed line, and their curved edges extend outwards to the left and right boundaries of the rectangle.

2026
WEEK 4

A diagram of a rectangle with a dashed line and two vertical dashed lines. The dashed line is horizontal and passes through the center of the rectangle. The two vertical dashed lines are parallel to each other and intersect the horizontal dashed line at its midpoint.

A diagram of a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their diameters are the top and bottom edges of the rectangle. The dashed line extends slightly beyond the semi-circles.

1 | 25 SUN

A diagram of a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their diameters are the top and bottom edges of the rectangle.

2026
WEEK 21

A diagram showing a rectangle with a dashed vertical line through its center. At each end of the rectangle, there is a semi-circle. The semi-circles are positioned such that their flat edges are aligned with the vertical dashed line, and their curved edges extend outwards from the rectangle's corners.

5 | 24 SUN

A diagram showing a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their flat sides are against the vertical sides of the rectangle.

2026
WEEK 23

A diagram of a rectangle with a dashed line and two vertical dashed lines. The dashed line is horizontal and passes through the center of the rectangle. The two vertical dashed lines are parallel to each other and intersect the horizontal dashed line at its endpoints.

A diagram of a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their flat sides are against the vertical sides of the rectangle. The dashed line extends slightly beyond the semi-circles.

6 | 7 SUN

A diagram of a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their flat sides are against the vertical sides of the rectangle, and their curved sides face each other.

2026
WEEK 45

11 | 8 SUN

A diagram showing a rectangle with a dashed vertical line in the center. At each end of the rectangle, there is a semi-circle. The semi-circles are positioned such that their flat edges are aligned with the vertical dashed line and the outer edges of the rectangle.

2027
WEEK 3

A diagram showing a rectangle with a dashed vertical line in the center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their flat edges are aligned with the vertical dashed line, and their curved edges extend outwards to the left and right boundaries of the rectangle.

2027
WEEK 4

A diagram of a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their diameters are the top and bottom edges of the rectangle.

1 | 24 SUN

A diagram of a rectangle with a dashed line passing through its center. At each end of the dashed line, there is a semi-circle. The semi-circles are positioned such that their flat edges are aligned with the vertical sides of the rectangle.
